- React JS | React hooks | NPM
- JavaScript | ES6
- TypeScript
- Material-UI
- HTML | HTML5
- CSS | CSS3 | SASS
- Python | Django
- Django REST Framework
- JWTs (JSON Web Tokens)
- Selenium
- PostgreSQL
- Command line
- Docker
- Git | GitHub
- Figma
- TDD (Test Driven Development)
- Visual Studio Code
- Responsive website/web app design & development
- MySQL Workbench
- Agile | Scrum

◦ LANGUAGES ◦

English

◦ HOBBIES ◦

- Health & fitness
- Sports
- Learning
- Reading

👤 PROFILE

I'm a driven and motivated developer. I am constantly looking for opportunities to further increase and develop my skills and knowledge. I am a fast learner and pride myself on paying close attention to details. In addition, I enjoy solving complex problems and facing new challenges that push me out of my comfort zone. I also love working with other people to accomplish a common goal, to the best of our efforts and abilities but I'm more than capable of doing tasks given to me, independently. I'm now currently available and looking for an opportunity in a full stack software developer role.

🏢 EMPLOYMENT HISTORY

Software developer at Codehance Ltd (Freelance), Remote

February — March 2022

Collaborating with a team of software developer to build a landing page for Codehance Ltd company using Figma, HTML5, CSS3 and SASS/SCSS.

Link: <https://www.codehance.com>

🎓 EDUCATION

Bachelor of Science (BSc) in sport & exercise science, University of Worcester, Worcester

September 2015 — July 2019

⚙️ COURSES

Full stack development bootcamp, CODEHANCE

March 2021 — Present

🏆 EXTRA-CURRICULAR ACTIVITIES

- Python crash course 2nd edition by Eric Matthes.
- HTML & CSS design and build websites by Jon Duckett.
- JavaScript & jQuery interactive front-end web development by Jon Duckett.
- Eloquent JavaScript 3rd Edition by Marijin Haverbeke.
- React JS official documentation by <https://reactjs.org/>
- Django official documentation by <https://www.djangoproject.com/>

★ FULLSTACK KEY SKILLS & EXPERIENCE

Idn central fitness backend django project (Freelance)

Created a health and fitness website that allows authorized users access to information of health and fitness clubs.

- Built a rest API using Django framework & Django rest framework.
- Write code for project using VS code IDE text editor.
- Built project using python programming language.
- Tested the API's rest methods (get, post, put, delete) requests using Postman as the API Client.
- Built a rest API that renders JSON data.
- Debugging.
- Used Trello (Kanban) to plan project.
- Committed and pushed project onto GitHub using git & git commands.
- Created database tables for Django app models using MySQL workbench.
- Used JWT authentication to allow registered users to access restricted web pages.
- Used the command line to make and change directories.

- Podcasts
- Drawing and art
- Technology
- Travel

- Utilized a JSON web tokens (JWT) to encode data.
- Implemented automated tests (TDD).
- Collaborated with other software developers using tools such as Slack, Zoom, Stack overflow to build project.
- Utilized CORS to connect frontend (ldn_central_fitness_frontend_react_project) to backend. And allow frontend to fetch data from backend.

Restaurant Booking Project (Freelance)

Built a web application using the Django framework that allows users to register and make restaurant and table bookings.

Key attributes of this project:

- Created database tables for Django app models using MySQL workbench.
- Installation and setup of python3.
- Installation and setup of Django.
- Built web application using Django framework.
- Write code for project using VS code IDE text editor.
- Committed and pushed project onto GitHub using git & git commands.
- Used the command line to make and change directories.
- Build frontend using Django template language & HTML5.
- Built project using python programming language.
- Implemented automated tests (TDD).
- Relational Database Design using PostgreSQL.
- Collaborated with other software developers using tools such as Slack, Zoom, Stack overflow to build project.
- Debugging.

Web-Scraping-Project (Freelance)

Created a bot that crawls on 2 broadband websites and scraps the broadband deals.

- Used selenium web driver to build bot.
- Built project using python programming language.
- Data/web scraping.
- Debugging.
- Committed and pushed project onto GitHub using git & git commands.

ldn_central_fitness_frontend_react_project (Freelance)

Created a health and fitness website that allows authorized users access to information of health and fitness clubs.

- Used Trello (Kanban) to plan project.
- Used Micro in planning project.
- Created design for web app using figma.
- Write code for project using VS code IDE text editor.
- Setup and installation of React JS using Node.js.
- Used npm commands to run React JS development server & install material UI component APIs & other React packages.
- Built project using React functional components.
- Built project using material UI component APIs.
- Built application using ES6 JavaScript programming languages & HTML5.
- Utilized props, useState, useEffect & useHistory hooks.
- Committed and pushed project onto GitHub using git & git commands.
- Used the command line to make and change directories.
- Styled and designed project using CSS3.
- Used Axios to send HTTP requests, to fetch data from a public API endpoint and to fetch data from backend database endpoints (ldn_central_fitness_backend_django_project).
- Debugging.
- Utilized asynchronous JavaScript functions.
- Built web app using responsive web design.
- Used breakpoints to make web app responsive.
- Utilized React router.

- Collaborated with other software developers using tools such as Slack, Zoom, Stack overflow to build project.

JOBPLUS Project (Freelance)

Created frontend webpages for a job and career recruitment agency.

Key attributes of this project:

- Created design for web app using figma.
- Built web app using mobile responsive web design.
- Used breakpoints to make web app responsive.
- Write code for project using VS code IDE text editor.
- Committed and pushed project onto GitHub using git & git commands.
- Used the command line to make and change directories.
- Built project using HTML5.
- Designed & styled project using CSS3.
- Implementation of SASS/SCSS to style web app.
- Implementation CSS grid and CSS flexbox in styling project.
- Collaborated with other software developers using tools such as Slack, Zoom, Stack overflow to build project.
- Debugging.
